Dear Frances,

On behalf of Kidney Health Australia we would like to extend our sincere gratitude to you for the outstanding results you achieved for Kidney Health Week. You effectively assisted us to continue to achieve our vision – to save and improve the lives of Australians affected by kidney disease.

Your generosity in time, your dedication and professionalism made an incredible difference to our ability to reach those 1.7 million Australians who do not know they have early kidney damage, which remains our biggest challenge.

Frances, thank you once again. We look very forward to continuing our association with you into the future, and to have an even greater impact on the prevention, detection and support of kidney health in Australia.

Kind regards,

Professor Carol Pollock
Chair
Kidney Health Australia

Dr Lisa Murphy
Interim CEO
Kidney Health Australia
